TECHNICAL DATA SHEET

D-STAIN

This product is a multi-functional hard surface cleaner. It utilizes foaming wetting agents, sequestering agents, alkaline builders and oxygen bleach to loosen dirt and remove stains on a variety of surfaces. The oxidizing power of hydrogen peroxide penetrates deep, cleaning and brightening hard to remove stains. Hydrogen peroxide is environmentally friendly - breaking down to water and oxygen - without the noxious odour of chlorine-based sanitizing products.

This product is ideally suited for pre-soaking and cleaning plastic dishes. It is also effective as a hard surface cleaner for walls, countertops and floors.

DIRECTIONS:

For Dishes: Add 2-4 oz. per gallon (15-30 grams/litre) of product to hot tap water in a sink or bus tray. Add dishes and soak for 10 - 15 minutes. Remove dishes, place in a dish rack and rinse thoroughly. Note: If dishes are placed directly into a dish washing machine without rinsing, excessive foaming may occur.

For General Cleaning: Use 1/2 - 1 oz. per gallon (4-7 grams/litre) in a clean bucket or sink. Clean surfaces using a cloth or mop. Change cleaning solution as necessary. Rinsing is not required.
