

L505

LDD-200 LAUNDRY DETERGENT

This product is a high quality, heavy duty, medium sudsing laundry compound that is extremely efficient in removing ground in dirt while not harming delicate fabrics. It is a dense, concentrated product and as such is more compact than most household detergents. It is blended to include complex detergent builders, surfactants, and optical brighteners. This product contains no phosphates.

DIRECTIONS: For top loading domestic type washers, add 1/2 – 3/4 cup per load. More may be required for heavy soil conditions. It is also ideally suited for use in high-efficiency domestic washers at 2-4 oz per load.

For use in commercial machines, add 6-8 oz. of detergent for each 50 lbs of dry clothes. More may be required for extra heavy soil and dirt conditions. It may also be used with an alkali booster.
