

X3

X3 is the complete detergent in every respect. It contains a unique combination of water softeners and surfactants along with an activated oxygen bleaching system and enzymes that provide bleaching and stain removal in a single wash cycle without detriment to the fluorescent whitening agents. Thus it eliminates the need for a special bleaching cycle and thereby reduces the processing time for a load. The activated oxygen bleaching system releases a peroxygen bleaching agent that is stronger than normal oxygen bleaches, but still is safe for all colors and fabrics. This stronger bleach also is effective in eliminating bad odors. The presence of four different enzyme systems assures the removal of many difficult stains which are not removed with a standard detergent formulation. This product is particularly effective in the removal of collar and cuff soils due to the presence of the enzymes. Furthermore it does not contain highly alkaline ingredients that can be damaging to the fabrics.

DIRECTIONS: Proper concentration of X3 will be determined by individual operating conditions, and the recommendation of your Service Representative..

DANGER: Causes severe skin burns and eye damage. May cause allergy or asthma symptoms or breathing difficulties if inhaled. Precautionary: Obtain special instructions before use. Do not breathe dust. Wash thoroughly after handling. Wear protective gloves First Aid: If swallowed: rinse mouth. Do NOT induce vomiting If on skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water/shower. If inhaled: Remove person to fresh air and keep comfortable for breathing. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor if exposed or concerned. Specific treatment: Wash contaminated clothing before reuse. Store locked up. Dispose of contents/container according to local, state, and federal regulations.
